

**Dornow –
Roller Peeling Machines**

DORNOW Builds Fifth Generation of Roller Peeling Machines

Sturdy construction: Service life 20 years or more!

Around 1970 we designed the first roller peeling machines in Europe - at that time a much sought-after new development which achieved a good deal of attention.

Around 1980 we were the first the world over to design roller peeling machines working without water. This was a sensation! This development has saved, now as before, costs and problems to many companies.

We have constantly improved our machines and are building today roller peeling machines which can give a good service for 20 years or more...

The 5th generation has a sturdy construction and is even more successful! It can peel in most fields of application without water and has a more than robust structure!

There is no trouble as far as the exchange of the peeling rollers is concerned. The special design makes sure that the staff can hardly make any mistakes on the re-mounting...

Before supplying a machine, your personnel can be instructed here or the training takes place during the assembly work.

What is more: The carborundum re-coating can be done by your own staff. If required, we will guide your technical personnel!

We made a point to provide all our roller peeling machines with very strong drive mechanisms that are distinguished by some further special innovations; of course, we cannot go into particulars here.

The bearings are outside the wet zone and are especially protected against the penetration of starch, foreign substances, water etc.

The 5th generation is available in many sizes and with different peeling rollers. We are sure to have the right machine for your company, too.

DORNOW roller peeling machines seem to be more expensive...In reality they are very good value on account of their sturdy construction and long service life...

We are supplying machines of **a piece**, with a minimum of moving parts...
Go and see for yourself. We invite you to inspect our machinery or come to a demonstration in our Peeling Test Center.

On the internet "www.dornow.de", "Product information",

Section A. Peeling machines, peeling Systems, peeling technology
 A. - 1. Peeling machines

you can find DORNOW- roller peeling machines as follows:

A. - 1.1	Roller peeling machines, R-OW series, diameter peeling rollers 150 mm (please see also A. - 1.32)
A. - 1.7	"Radical" roller peeling machines R-RAD-60-A to R-RAD-250-A, etc.
A. - 1.8	"UNIVERSAL SKIN-REMOVER" (SR) MACHINES R-SR-60-A to R-SR-250-A, etc.
A. - 1.24	Drum-type peeling machines
A. - 1.32	Roller peeling machines, series "100", diameter peeling rollers 100 mm (please see also A. - 1.1)

Many products can be peeled on our peeling machines; for more information please refer to the section cited above!

A list of interesting articles and essays regarding the topics of the preparation and processing of tubers and vegetables and associated specialist areas can be found at our Internet site at www.dornow.de, Treatises.

**Review of your current peeling results or
before the purchase of a peeling machine or system:**

**Realistic test peelings with the most diverse peeling systems,
with the most diverse tubers and root vegetables, some fruit, with your raw
produce are possible in our Peeling Test Center!**
