Peeling Tests with a Multi-Disc-Peeling Machine MSS Universal Peeling Machine

(quickly convertible for: Blade peeling or carborundum peeling or combined carborundum/blade peeling or onion peeling)

You can carry out trial peelings with a universal peeling machine from the above-mentioned series in our Peeling Test Center for a small fee to cover costs.

Various blade peeling discs, carborundum peeling discs, onion peeling discs and special-designed discs can be made available for the tests. They can be easily and quickly exchanged.

The universal peeling machines can peel the following: potatoes, carrots, celeriac, sweet potatoes, onions, tunips, nearly all tubers and root vegetables, various tropical fruits, some other types of fruit such as mangos.

During the tests, a technical adviser and a machine operator will normally be present on our part.

The raw goods are made available by the customer who wants to have the tests carried out. This to make sure that the raw material corresponds, as far as its quality goes, to that which is also peeled in the customer`s factory.

In some exceptional cases the raw goods can be made available by us against refund of costs. However, we have little or no influence on the quality of these raw goods.

A description of the MMS machines is given, for instance, on our treatise Q154 in the form of a short description. This paper can be made available to you on request.

The test date must be coordinated **in time** with our office.

We`ll be able to prepare the tests carefully, if we know in detail the requirements of the customer as well as type and condition of the raw goods and possibly further circumstances.

It is desirable that the customer gives us, in advance, a written exposition of his wishes and ideas. In any case a discussion (eventually by telephone) should take place, before

starting the tests, between those interested in carrying out the tests and our technical adviser.

Please ask us for the conditions to carry out the tests with this “universal peeling machine”! At present, the fee to cover costs is € 150,-- plus VAT.

Pictures and information about the MSS-Peeling machines on the web: [dornow.de / Peeling Machines / A.-1.A / A.-1.2](http://dornow.de/Peeling%20Machines/A.-1.A/A.-1.2).

A list of interesting articles and essays regarding the topics of the preparation and processing of tubers and vegetables and associated specialist areas can be found at our Internet site at www.dornow.de, Treatises.

**Review of your current peeling results or
before the purchase of a peeling machine or system:**

**Realistic test peelings with the most diverse peeling systems,
with the most diverse tubers and root vegetables, some fruit, with your raw
produce are possible in our Peeling Test Center!**

This paper contains non-committal notes. We do not lay claim to completeness. Alterations reserved. Our order confirmation, accepted by our customers, is in effect upon delivery. - The presentation of a new edition of this treatise will substitute for any previous versions.
